SUMMARY

An aspiring junior software engineer eager and excited to take on a new challenge, learn a new skillset, and gain a greater understanding of the ins and outs of the software development industry. As a self-taught multi-instrumental musician and producer of nearly 15 years, I have come to the realization that I have more to offer in the professional software development field as I have become an intensely client side motivated worker with a burning desire expand upon what I know and implement my newly found skillset in a greater context.

TECHNICAL SKILLS

-
- | | | |
|--------------|--------------|--------------|
| • HTML/CSS | • TypeScript | • Git/GitHub |
| • JavaScript | • Angular | • API's |
| • Node.JS | • PostgreSQL | • TDD |

EDUCATION

Grand Circus Front-End Bootcamp

January 2020 - March, 2020

Midterm: Contributed to the development of an angular based web application that returns cookbook recipes that the user can search, view details about the recipe, a favorite option, and a link to the full recipe page.

Final: Developed and deployed an angular based website designed as a k-8 learning tool for our solar system. All data was pulled from the NASA open API and features an updating picture of the day, an interactive collage of photographs from all 3 mars rovers, a "meet the planets" section where users can click on any planet to learn information about them, a NASA news page, and a live RSS feed

Macomb Community College
Biology & Pre Engineering

August, 2013 - May, 2019
